The Health of the Hair

is indicated by its condition. When the natural secretions decrease; when the hair becomes dry, splits at the ends and comes out in combing; when the gloss disappears and the hair becomes gray or faded, the till health of the hair is indicated. The success of AYER'S HAIR OIGOR is due to the fact that it restores the hair-producing organs to their natural vigor. It encourages and promotes the secre-tions of the hair follicles, and thus gray or faded hair regains its original

color, new growth begins, and lost lustre is restored.

IRON AND STEEL

No Special Changes in the Market-Inste-tivity at all Points. PITTSBURGH, Pa., July 7.—The American Manufacturer in its weekly

trade review will say to-morrow:

"The general conditions of trade this week are precisely those noted at last account. All points report the same inactivity and all put it down to about the same cause. In the eastern market there are no material changes to record. New York reports no signs of speculation in crude fron, and orders for finished products are small. Southern pig fron producers are selling freely and the northern furnaces are shading prices to meet the competition. At Philadelphia, trade is quiet and there is no anxiety to purchase. Foundry pig irons show a slight improvement, but grey forge is in a bad way. Some big transactions in Bessemer billels are expected soon. Bar iron is very cheap. Pipes and tubes are firm and the plate indicate the plate is doing in structural iron and steel. 'Chicago reports a generally light trade, by the tacit agreement of both sides. Some pig iron consumers are hurrying shipments on old orders, and an unusually large amount of southern tron is finding its way into that market. New York reports no signs of specula-

an unusually large amount of southern iron is finding its way into that market

iron is finding its way into that market. Bessemer billets are very slow.

At Cincinnati the volume of business is extremely light. The furnaces have orders for delivery late in the season, but that does not help present business. There is quite a heavy buying in merchant steel. Cleveland reports state that the valley furnaces are closing down according to agreement. Foundry iron is in better demand, the sheet mills are crowded, and other branches are rather dull.

The pig iron output at Wheeling is being reduced. Finished lines continue slow."

West Virginian Nominated.

WASHINGTON, D. C., July 7 .- Among the nominations sent to the senate to day by the President was: Second lieutenants—William H. Chadbourn, jr., of North Carolina; Samuel D. Brady, of West Virginia.

BRIDGEPORT.

Happenings of Interest in the Town at

the end of the Bridge.

The publication in two evening papers of July 6 and a morning paper of July 7 regarding the action of the council of Bridgeport taken at the meeting on Tuesday night on the proposed street paving, are about as near the facts in either case as those papers usually get. The statement that the council had re-

pealed the ordinance providing for the issue of bonds for street paving and had employed J. C. Heinlein to assist Sollettor W. V. Campbell in drawing up ordinance is absolutely untrue and without any foundation whatever.

and without any foundation whatever. The facts in the matter are these:

The former council, at a meeting held in March last, passed a resolution prepared by its solicitor, George Duncan, providing for the issuing of bonds for street improvement, and it was submitted to a vote of the people at the spring election and carried by a large majority.

After the election of the pressur course.

Nearly all women look forward to the ordeal of motherhood with so much dread and anxiety that only after the baby has safely arrived and made a warm little place for himself in the mother's heart, does she fairly realize that it was indeed a good anget who brought this wee nestling to brighten and sweeten her life.

Women who are approaching motherhood with a sense of fear and solicitude, or in a weakened physical condition, need the help of that marvelons "Favorite Prescription" invented by Dr. R. V. Pierce, chief consulting physician of the Invalids Hotel and Surgical Institute, Buffalo, N. Y., and designed expressly to restore healthy vigor to the delicate feminine structure involved in motherhood. It takes away all of the dauger and most of the pain attendant upon motherhood, and confers on the baby that listy hardihood which is a juy to a mother's heart.

An Ohio lady, Mrs. Lefa Roffinire, of Claring-

cil the question as to the legality of the resonation was raised and was referred to the present solicitor, W. V. Campbell, for an opinion in the matter, and he reported that in his judgment the resolution was not its accordance with the provisions of the statutes, and advised council to repeal it and pass another. Council followed the advice and mattucted the solicitor to prepare an ordinance repealing the former action and submit it to council at the meeting next. Tuesday, night. This is all that has been done in the matter.

Mrs. Harry M. Clark arrived in Bridgeport on the Fourth from Cripple Creek, Colorado. She was accompanied by her two little children and has returned to stay.

Some benevoiently disposed women on the Ohio side are talking of making a request of J. K. Jolly to allow them to run his cars one day for charity.
